

HARSHITH KUMAR D H

Full-Stack Developer & B.E. Artificial Intelligence & Data Science Student

Bengaluru, Karnataka | +91 8073098262 | harshith63633@gmail.com
LinkedIn: linkedin.com/in/harshith-kumar-316a93339 | GitHub: github.com/harshi-77

OBJECTIVE

B.E. Artificial Intelligence & Data Science student seeking Full-Stack Developer opportunities, with hands-on experience building web applications using React, Python, Flask/FastAPI, databases, authentication, APIs, and machine-learning integrations. Experienced in developing project prototypes for hackathons and academic work, with a focus on practical problem solving and end-to-end application development.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, HTML, CSS, SQL, R
Frontend	React.js, Vite, Tailwind CSS, Responsive Web Design
Backend	Flask, FastAPI, REST APIs, JWT Authentication, Supabase Authentication
Databases	Supabase / PostgreSQL, Firebase
AI / ML	NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV, NLP, CNN, Deep Learning, Computer Vision, Transfer Learning
Tools	Git, GitHub, VS Code, Figma, Vercel, Netlify, Android Studio

EDUCATION

B.E. – Artificial Intelligence & Data Science	CGPA: 7.4
Sapthagiri NPS University 5th Semester Expected 2028	
PUC	86%
Siddhaganga PU College 2024	
SSLC	80%
BMN Public School 2022	

PROJECTS

DISHA – Intelligent Mobility & Route Planning Platform

Team of 6 | Under Development

Full-stack project for intelligent mobility and route planning. Contributed across frontend development and partial backend development, with React, Vite, Tailwind CSS, Python/FastAPI, Supabase and PostgreSQL. The platform is being developed around dynamic route-planning and optimization concepts.

AI Medical Imaging Diagnostics Dashboard

Full-Stack Developer | Team of 3 | Completed | SJC Institute of Technology Hackathon

Built an end-to-end medical imaging application supporting X-ray, MRI and CT uploads, AI-based image analysis, abnormality detection, confidence and severity outputs, highlighted review areas, clinical guidance, PDF reporting, authentication, database/storage and clinician dashboard functionality. Used React, Vite, Tailwind CSS, FastAPI, Supabase, PyTorch, TensorFlow, EfficientNet-B0, ResNet18 and MobileNetV2.

Smart Email Triage Tool

Hackathon Project | Team of 4 | Certificate Received

Developed an intelligent email triage application using NLP and machine learning to categorize and prioritize incoming emails. Contributed across frontend, backend, database, NLP/ML, email classification and prioritization, API integration, authentication, testing and documentation.

FarmLink AI

SIH 2026 | Team of 6 | Research & Presentation | Certificate Received

Contributed research and presentation work for a farmer-to-buyer platform concept addressing demand forecasting, buyer matching, order consolidation and logistics optimization. Team BioSphere; SIH problem statement SIH26033.

Indian Cattle & Buffalo Breed Recognition

Full-Stack Developer | Team of 3 | Completed

Built a computer-vision application that identifies cattle and buffalo breeds from images and provides breed information and related details using Python, machine learning, Computer Vision and MobileNetV2.

Stock Market Analysis

College Mini Project | Developer | Completed | Presidency University Certificate

Developed a stock-market analysis and prediction project using Python, R, machine learning, web development and IoT simulation.

CERTIFICATIONS

- Advanced Excel Training 2019 — Infosys Springboard (2026)
- Introduction to OpenAI GPT Models — Infosys Springboard (2026)
- Data Visualisation with Python — Infosys Springboard (2026)
- CyberOps Associate — Cisco Networking Academy / Sapthagiri College of Engineering (2025)
- Introduction to Microcontrollers & Coding [Centrada kit] — Infosys Springboard (2026)

STRENGTHS

Problem Solving • Creative Thinking • Team Collaboration • Quick Learning • Attention to Detail

GitHub Projects: github.com/harshi-77 | Primary Target: Full-Stack Developer
